

RISK WARNING

Cryptocurrencies are new, modern technologies they entail various risks that you should understand.

Bitcoin and Ethereum transactions are irreversible. If you send Bitcoin or Ether (BTC or ETH) to an incorrect address, or send the wrong amount of BTC or ETH, you cannot get it back. RigelPlatform will not be liable for executing a transaction if the instruction relates to an incorrect BTC or ETH address.

Before buying or selling BTC or ETH, you should educate yourself about cryptocurrencies. Buying and selling BTC or ETH entails risks and could result in a complete loss of your funds. Please ensure that you fully understand the risks involved and do not invest money that you cannot afford to lose.

Bitcoin and Ethereum are not backed by any entity. Neither RigelPlatform nor anyone else has an obligation to buy back your BTC or ETH in the future. Additionally it is very important to understand the following risks:

- Transactions in BTC and ETH are generally irreversible, and losses due to fraudulent or accidental transactions may not be recoverable;
- BTC and ETH are derived from the continued willingness of market participants to exchange local currency for BTC and ETH, which may result in the potential for permanent and total loss of value, should the market for BTC or ETH disappear;
- BTC and ETH transactions shall be deemed to be made when recorded on a “blockchain” ledger, which is not necessarily the date or time that you initiate the transaction;
- The nature of cryptocurrency may lead to an increased risk of fraud or cyber attack;
- The nature of cryptocurrency means that any technological difficulties experienced by a service provider may prevent access to or use of your BTC or ETH.
